Professional Experience

Edmund's Govtech - Egg Harbor, NJ

March 2026 – Oct 2026

Senior Software Engineer I/Project Lead (React-Native)

- Directed a 3-person engineering team in the ground-up rewrite of legacy EGT civic operations mobile apps utilized by 2,100+ cities and municipalities using React-Native, Claude Code, and Figma
- Accelerated development cycles by 80% by pioneering AI-assisted workflows, integrating Claude Code for automated code reviews, custom Model Context Protocols (MCPs), and skill generation
- Architected a scalable monorepo infrastructure from scratch, defining core repository structure, strict coding standards, and linting practices for the entire mobile ecosystem.
- Engineered comprehensive CI/CD and End-to-End (E2E) testing pipelines utilizing GitLab, Expo EAS, Maestro, and Jest for mobile, alongside Playwright for multiple AngularJS websites
- Partnered with Product Management to define requirements & refine JIRA backlogs, while delivering weekly product demos to executive leadership to align technical milestones with business goals
- Mentored junior backend engineers, translating high-level product requirements and JIRA tickets into tangible, scalable APIs to power the core Meter Management app
- Managed release management and QA enablement, overseeing build handoffs, establishing testing protocols, and fielding technical queries to streamline QA validation cycles

Game-U - Flemington, NJ (remote)

Nov 2024- March 2026

Senior Full Stack Mobile Developer (React-Native)/Accelerate Instructor (C#, Unity3D, React, Python, JS)

- Spearheaded full-stack mobile application and system-wide tooling/analytics using React-Native, React, Expo, TypeScript, Figma, and PHP aimed at vastly increasing client engagement and retention
- Engineered games across a plethora of genres including 3D First Person Shooters and Racers, RPGs, 2D Fighters, and iOS/Android mobile games and apps.
- Provided private instruction for adults and children of all ability levels teaching a wide variety of skills including Programming, App and Website Design, Shader Basics, 3D modeling, and UI/UX design.
- Created AI Chat companions for mobile with voice recognition and facial detection features using Python, Gemini, ElevenLabs, Unity, C#, .NET, and XCode
- Explored and integrated emerging programs and technologies such as ElevenLabs and SadTalker to enhance lesson plans and ensure the use of up-to-date tools and techniques
- Provided hands-on technical guidance to students, empowering them successfully build, optimize and publish playable games, improving technical and creative skills

MedTrak, Inc - Conshohocken, PA

April 2017 - July 2023

Lead App Developer (React-Native)/Senior Full Stack Engineer (React)

- Served as Project Lead for cross-platform CareSense mobile app used by 15k+ users and hospitals to parse, analyze, and display sensitive medical data and significantly improve patient outcomes
- Engineered Full Stack website and app solution and APIs using React-Native, React, PHP, SQL, and JS
- Unified and handled system-wide AWS S3 integrations ensuring compliance with HIPAA standards

- Maintained Android/iOS SDKs and certificates and oversaw app testing and respective store presence and publishing
- Developed extensive logging & crash reporting tools for the app resulting in 75% faster bugfix times
- Researched and implemented CI/CD workflows using Bitbucket, CodePush, Firebase, APNS, Git, GCP, Fastlane and Jest integrations to streamline product development and deliver customized feature requests for clients under tight timelines in a fast-paced environment
- Performed weekly standups and code reviews to provide junior developers with mentorship and coding guidelines and track work & provide project status updates to non-technical teams

Imagination Vent LLC - San Diego, CA

Aug. 2016 - Feb. 2017

Lead Game Programmer (Unity3D/C#)

- Refactored pre-existing C++/C engine to Unity C# and fixed & built upon existing game architecture for a 3D Fighting Game
- Trained & managed the programming department
- Assisted in planning overall game design and product pitches to investors and implemented all feedback to stakeholder's evolving requirements
- Acted as liaison between programming, management & art departments ensuring high-quality asset integration and versioning

Skylless Game Studios - Philadelphia, PA

March 2015 - Sept. 2015

Mobile Game Programmer (Unity/C#)

- Assisted in conceptualization and implementation of products for clients using Unity3D and Unity2D
- Researched & Implemented alternate revenue streams via in-game advertisement & currency
- Worked on multiple shipped iOS and Android products using C# and Agile Scrum methodologies
- Refactored & overhauled legacy code for the grid-based placement system in a city building game
- Implemented version control to legacy project via Perforce

Additional Experience

Juicy Pulp Games - Philadelphia, PA

Sept 2023 - Present

Founder/Lead Developer (Unity3D, C#, .NET)

- Led a team of 4 to produce, program, and design an action FPS title in Unity3D in C# and .NET
- Integrated back-end systems supporting 1,500+ unique users including authentication, online leaderboards, and deployment configurations for live environments via Steamworks
- Developed cross-team tool suite used by non-programmers for rapid and accessible level generation, trailer production, and event-based scripting
- Programmed customizable and performant AI with versatile enemy behaviors and player detection in a 3D environment using linear algebra and strategy, observer, and visitor patterns
- Designed and implemented all UI/UX components including shops, HUDs, and ranking screens to ensure a seamless user experience
- Optimized game performance for WebGL and lower-end devices, achieving a 60% increase in frame rate and attracting over 20,000 views across 2 demos

Education

Bachelor of Science in Computer Science

Sept. 2011 - June 2016

Drexel University, Philadelphia, PA

Concentrations in Human Computer Interaction & Video Game Development and Programming
