Skills

- Over 10 years of Software Engineering experience with a specialty in Mobile and Game Development
- Strong proficiency in developing and maintaining cross-platform mobile Android, iOS, and Web applications using React, React-Native and Redux
- Years of experience in delivering exceptional user experience in web applications using modern and responsive UIs and performant RESTful apis.
- Strong understanding of multiple 3D game engines and technologies including Unity, Unreal Engine, Figma, Blender, Probuilder, Visual Studio, XCode, Android Studio, and Photoshop
- Effective communication and collaboration skills, consistently earning leadership positions and/or liaison roles as the “bridge” between programming and art/sound teams.

Professional Experience

Juicy Pulp Games - Philadelphia, PA
Founder/Lead Developer (Unity3D)

Sept 2023 - Present

- Led a team of 4 to produce, program, and design an action FPS title in Unity3D
- Programmed customizable and performant AI with versatile enemy behaviors featuring dynamic pathing, aiming, and player detection solutions in a 3D environment
- Optimized game performance for WebGL and low-end devices, achieving a 60% boost in frame rate
- Designed and implemented all UI/UX components including shops, HUDs, scene transitions, and ranking screens to ensure a seamless user experience with modular, reusable components
- Oversaw Art Direction from spritework to visual effects and custom shaders to ensure high-quality and consistent asset integration
- Developed cross-team tool suite used by non-programmers for rapid and accessible level generation, trailer production, and event-based scripting
- Integrated back-end systems supporting 1,500+ unique users including authentication, online leaderboards, and deployment configurations for live environments via Steamworks

MedTrak, Inc - Conshohocken, PA

April 2017 - July 2023

Lead App Developer (React-Native)/Senior Full Stack Engineer (React)

- Served as Project Lead for cross-platform mobile CareSense app used by 15k+ users and hospitals to parse, analyze, and display sensitive medical data and significantly improve patient outcomes
- Handled all UI/UX design and implementation within the app improving user engagement by 40%
- Engineered full stack app and website solution using React-Native, ReactJS, PHP, and MySQL
- Oversaw all app testing, debugging, and development, and created companion patient portal website in React with features including photo uploads, IRC chat, and real-time event handling
- Maintained all libraries, APIs, native Android/iOS code, and React-Native code relating to app in addition to yearly SDK upgrades in compliance with Google Play Store and Apple policies
- Optimized data retrieval, storage, and parsing resulting in 60% faster boot times.
- Unified and handled system-wide AWS S3 integrations ensuring compliance with HIPAA standards

Imagination Vent LLC - San Diego, CA

Aug. 2016 - Feb. 2017

Lead Game Programmer

- Led development of a Platform Fighter game in the transition from alpha through to beta phase
- Refactored pre-existing C++/C engine to Unity C# and fixed and built upon code
- Trained & managed the programming department
- Created, Designed, and Tested weekly builds
- Acted as liaison between programming, management & art departments
- Assisted in planning overall game design and product pitches to investors

Additional Experience

Game-U - Flemington, NJ (remote)

Oct 2024- Present

Accelerate Instructor (part-time)

- One-on-one instructor for adults and children of all ability levels teaching a wide variety of skills including programming, game design/development, 3D modeling, and digital art.
- Guide special needs students in planning and executing long-term projects, fostering creativity and problem solving skills.
- Research and integrate new programs and technologies to enhance lesson plans and ensure the use of up-to-date tools and techniques
- Provide hands-on support to students, helping them build and publish small games, improving technical and creative skills
- Cultivate a positive learning environment and strong rapport with students, with students expressing strong enthusiasm and appreciation for lessons

Education

Bachelor of Science in Computer Science

Sept. 2011 - June 2016

Drexel University, Philadelphia, PA

Concentrations in Human Computer Interaction & Video Game Development and Programming
